Revision: 0.2 CP2614 v1.2 RS 136-8534

SAFETY DATA SHEET

Siliconespray

According to Regulation (EC) No 1907/2006, Annex II, as amended. Commission Regulation (EU) No 2015/830 of 28 May 2015.

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Product name Product number Siliconespray CBS-623

UFI

UFI: AFUC-40TE-2001-KVCA 1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses

Lubricant.

Uses advised against No specific uses advised against are identified. 1.3. Details of the supplier of the safety data sheet

Supplier

Cobra Clean B.V. Tweelingenlaan 4 7323 AM Apeldoorn

info@cobraclean.nl www.cobraclean.nl

1.4. Emergency telephone number

Emergency telephone

+31 6 20951195

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture Classification (EC 1272/2008)

Physical hazards Health hazards

Aerosol 1 - H222, H229 STOT SE 3 - H336 Asp. Tox. 1 - H304

Aquatic Chronic 2 - H411

Environmental hazards

2.2. Label elements Hazard pictograms

Signal word

Danger

1/12

Revision: 0.2

Siliconespray

	Cicali
Hazard statements	H222 Extremely flammable aerosol.
	H229 Pressurised container: may burst if heated.
	H336 May cause drowsiness or dizziness.
	H411 Toxic to aquatic life with long lasting effects.
Precautionary statemen	ts P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition
	sources. No smoking.
	P211 Do not spray on an open flame or other ignition source.
	P251 Do not pierce or burn, even after use.
	P261 Avoid breathing spray.
	P410+P412 Protect from sunlight. Do not expose to temperatures exceeding
	50°C/122°F.
	P501 Dispose of contents/ container in accordance with national regulations.
Contains	pentane
Supplementary precauti	ionary P271 Use only outdoors or in a well-ventilated area.
statements	P273 Avoid release to the environment.
	P304+P340 IF INHALED: Remove person to fresh air and keep comfortable for
	breathing.
	P312 Call a POISON CENTRE/doctor if you feel unwell.
	P391 Collect spillage.
	P403+P233 Store in a well-ventilated place. Keep container tightly closed.
2.3. Other hazards	This product does not contain any substances classified as PBT or vPvB.
3.2. Mixtures pentane CAS number: 109-66-0 Classification Flam. Liq. 2 - H225	60-100% EC number: 203-6 92-4 REACH registration number: 01-2119459286-30-XXXX
STOT SE 3 - H336	
Asp. Tox. 1 - H304	
Aquatic Chronic 2 - H41	
Carbon Dioxide	1-5%
CAS number: 124-38-9	
Classification	
Press. Gas (Comp.) - H	z80 rd statements is displayed in Section 16.
	u statements is displayed in Section 10.
SECTION 4: First aid m	2011/250
4.1. Description of first a	
General information	Get medical attention immediately. Show this Safety Data Sheet to the medical personnel.
Inhalation	Remove affected person from source of contamination. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt. When breathing is difficult, properly trained personnel may assist affected person by administering oxygen. Place unconscious person on their side in the recovery position and ensure breathing can take place.

Ingestion Skin contact Eye contact	Rinse mouth thoroughly with water. Remove any dentures. Give a few small glasses of water or milk to drink. Stop if the affected person feels sick as vomiting may be dangerous. Do not induce vomiting unless under the direction of medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Place unconscious person on their side in the recovery position and ensure breathing can take place. Maintain an open airway. Loosen tight clothing such as collar, tie or belt. Rinse with water.
	apart. Continue to rinse for at least 10 minutes.
Protection of first aiders	First aid personnel should wear appropriate protective equipment during any rescue. Wash
	contaminated clothing thoroughly with water before removing it from the affected person, or
	wear gloves. It may be dangerous for first aid personnel to carry out mouth-to-mouth resuscitation.
4.2. Most important sym	ptoms and effects, both acute and delayed
General information	See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.
Inhalation	A single exposure may cause the following adverse effects: Headache. Nausea, vomiting.
	Central nervous system depression. Drowsiness, dizziness, disorientation, vertigo. Narcotic effect.
Ingestion	Due to the physical nature of this product, it is unlikely that ingestion will occur. Aspiration
	hazard if swallowed. Entry into the lungs following ingestion or vomiting may cause chemical pneumonitis.
Skin contact	Repeated exposure may cause skin dryness or cracking.
Eye contact	May be slightly irritating to eyes. May cause discomfort.

4.3. Indication of any immediate medical attention and special treatment needed Notes for the doctor Treat symptomatically.

SECTION 5: Firefighting measures

5.1. Extinguishing media

Suitable extinguishing m The product is flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.

Unsuitable extinguishing Do not use water jet as an extinguisher, as this will spread the fire. media

5.2. Special hazards arising from the substance or mixture

Specific hazards	Containers can burst violently or explode when heated, due to excessive pressure build-up.	
	Bursting aerosol containers may be propelled from a fire at high speed. If aerosol cans are	
	ruptured, care should be taken due to the rapid escape of the pressurised contents and	
	propellant. Vapours may form explosive mixtures with air.	
Hazardous combustion	Thermal decomposition or combustion products may include the following substances:	
products	Harmful gases or vapours.	

Protective actions during Avoid breathing fire gases or vapours. Evacuate area. Keep upwind to avoid inhalation of firefighting gases, vapours, fumes and smoke. Ventilate closed spaces before entering them. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapours and protect men stopping the leak. Avoid discharge to the aquatic environment. Control run-off water by containing and keeping it out of sewers and watercourses. If risk of water pollution occurs, notify appropriate authorities.

Special protective equipWear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protectivefor firefightersclothing. Firefighter's clothing conforming to European standard EN469 (including helmets,
protective boots and gloves) will provide a basic level of protection for chemical incidents.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures Personal precautions

No action shall be taken without appropriate training or involving any personal risk. Keep unnecessary and unprotected personnel away from the spillage. Wear protective clothing as described in Section 8 of this safety data sheet. Follow precautions for safe handling described in this safety data sheet. Wash thoroughly after dealing with a spillage. Ensure procedures and training for emergency decontamination and disposal are in place. Do not touch or walk into spilled material. Evacuate area. Risk of explosion. Provide adequate ventilation. No smoking, sparks, flames or other sources of ignition near spillage. Promptly remove any clothing that becomes contaminated.

6.2. Environmental precautions

Environmental precautions

Avoid discharge into drains or watercourses or onto the ground. Avoid discharge to the aquatic environment. Large Spillages: Inform the relevant authorities if environmental pollution occurs (sewers, waterways, soil or air).

6.3. Methods and material for containment and cleaning up

Methods for cleaning up Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Eliminate all ignition sources if safe to do so. No smoking, sparks, flames or other sources of ignition near spillage. Approach the spillage from upwind. Under normal conditions of handling and storage, spillages from aerosol containers are unlikely. If aerosol cans are ruptured, care should be taken due to the rapid escape of the pressurised contents and propellant. Small Spillages: Wipe up with an absorbent cloth and dispose of waste safely. Large Spillages: If the product is soluble in water, dilute the spillage with water and mop it up. Alternatively, or if it is not water-soluble, absorb the spillage with an inert, dry material and place it in a suitable waste disposal container. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. Dangerous for the environment. Do not empty into drains. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority.

6.4. Reference to other sections

Reference to other sections

For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13.

SECTION 7: Handling and storage

Usage precautions Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Avoid exposing aerosol containers to high temperatures or direct sunlight. The product is flammable. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not handle until all safety precautions have been read and understood. Do not handle broken packages without protective equipment. Do not reuse empty containers. Do not spray on an open flame or other ignition source. Do not pierce or burn, even after use. Spray will evaporate and cool rapidly and may cause frostbite or cold burns if in contact with skin. Avoid contact with eyes. Avoid inhalation of vapours and spray/mists. Advice on general Wash promptly if skin becomes contaminated. Take off contaminated clothing. Wash occupational hygiene contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.

7.2. Conditions for safe storage, including any incompatibilities

Store away from incompatible materials (see Section 10). Store in accordance with local	
regulations. Keep away from oxidising materials, heat and flames. Keep only in the original	
container. Keep container tightly closed, in a cool, well ventilated place. Keep containers	
upright. Protect containers from damage. Protect from sunlight. Do not store near heat	
sources or expose to high temperatures. Do not expose to temperatures exceeding	
50°C/122°F. Bund storage facilities to prevent soil and water pollution in the event of spillage.	
The storage area floor should be leak-tight, jointless and not absorbent.	
Miscellaneous hazardous material storage.	

7.3. Specific end use(s)

Specific end use(s) The identified uses for this product are detailed in Section 1.2.

SECTION 8: Exposure controls/Personal protection

8.1. Control parameters Occupational exposure limits pentane Long-term exposure limit (8-hour TWA): WEL 600 ppm 1800 mg/m³ Carbon Dioxide Long-term exposure limit (8-hour TWA): WEL 5000 ppm 9150 mg/m³ Short-term exposure limit (15-minute): WEL 15000 ppm 27400 mg/m³ WEL = Workplace Exposure Limit 8.2. Exposure controls Protective equipment Appropriate engineering Provide adequate ventilation. Personal, workplace environment or biological monitoring may controls be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Use process enclosures, local exhaust ventilation or other engineering controls as the primary means to minimise worker exposure. Personal protective equipment should only be used if worker exposure cannot be controlled adequately by the engineering control measures. Ensure control measures are regularly inspected and maintained. Ensure operatives are trained to minimise exposure.

Revision date: 22/11/2019

Siliconespray

Eye/face protection Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with European Standard EN166. Unless the assessment indicates a higher degree of protection is required, the following protection should be worn: Tight-fitting safety glasses.

Hand protection Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. To protect hands from chemicals, gloves should comply with European Standard EN374. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. Frequent changes are recommended.

Other skin and body Appropriate footwear and additional protective clothing complying with an approved standard protection should be worn if a risk assessment indicates skin contamination is possible. Provide eyewash station and safety shower. Contaminated work clothing should not be Hygiene measures allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment and the work area every day. Good personal hygiene procedures should be implemented.

> Wash at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke. Preventive industrial medical examinations should be carried out. Warn cleaning personnel of any hazardous properties of the product. Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Ensure all respiratory protective equipment is suitable for its intended use and is 'CE'-marked. Check that the respirator fits

> tightly and the filter is changed regularly. Gas and combination filter cartridges should comply with European Standard EN14387. Full face mask respirators with replaceable filter cartridges should comply with European Standard EN136. Half mask and quarter mask respirators with

replaceable filter cartridges should comply with European Standard EN140.

controls

Respiratory protection

Environmental exposure Keep container tightly sealed when not in use. Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	Aerosol.
Colour	Colourless.
Odour	Organic solvents.
Odour threshold	Not available.
рН	Not available.
Melting point	Not available.
Initial boiling point and range	Not available.
Flash point	> 250°C
Evaporation rate	Not available.
Evaporation factor	Not available.
Flammability (solid, gas)	Not available.

Revision: 0.2

Siliconespray

Upper/lower flammability or	Not available.
explosive limits	
Other flammability	Not available.
Vapour pressure	Not available.
Vapour density	Not available.
Relative density	Not available.
Bulk density	0.9 kg/l
Solubility(ies)	Not available.
Partition coefficient	Not available.
Auto-ignition temperature	Not available.
Decomposition Temperature	Not available.
Viscosity	Kinematic viscosity $\leq 20.5 \text{ mm}^2/\text{s}$.
Explosive properties	Not available.
Oxidising properties	Not available.
9.2. Other information	
SECTION 10: Stability and reactive	<i>r</i> ity
10.1. Reactivity	
Reactivity	S e the other subsections of this section for further details.
10.2. Chemical stability	
Stability	Stable at normal ambient temperatures and when used as recommended. Stable
	under the prescribed storage conditions.
10.3. Possibility of hazardous read	ctions
Possibility of hazardous	The following materials may react strongly with the product: Oxidising agents.
reactions	
10.4. Conditions to avoid	
Conditions to avoid	Avoid exposing aerosol containers to high temperatures or direct sunlight. Pressurised
	container: may burst if heated
10.5. Incompatible materials	
Materials to avoid	No specific material or group of materials is likely to react with the product to produce
	a hazardous situation.
10.6. Hazardous decomposition p	roducts
Hazardous decomposition	Does not decompose when used and stored as recommended. Thermal
products	decomposition or combustion products may include the following substances:
	Harmful gases or vapours.
SECTION 11: Toxicological inform	nation
11.1. Information on toxicological	
Acute toxicity - oral	
Notes (oral 50)	Based on available data the classification criteria are not met.
Acute toxicity - dermal	
Nata a Valanna al LD) Based on available data the classification criteria are not met.
Notes (dermai LD 50

Acute toxicity - inhalation	
Notes (inhal ₅₀)	Based on available data the classification criteria are not met.
Skin corrosion/irritation	
Animal data	Based on available data the classification criteria are not met.
Serious eye damage/irritation	
Serious eye damage/irritation	Based on available data the classification criteria are not met.
Respiratory sensitisation	
Respiratory sensitisation	Based on available data the classification criteria are not met.
Skin sensitisation	
Skin sensitisation	Based on available data the classification criteria are not met.
Germ cell mutagenicity	
Genotoxicity - in vitro	Based on available data the classification criteria are not met.
Carcinogenicity	
Carcinogenicity	Based on available data the classification criteria are not met.
IARC carcinogenicity	None of the ingredients are listed or exempt.
Reproductive toxicity	
Reproductive toxicity - fertility	Based on available data the classification criteria are not met.
Reproductive toxicity -	Based on available data the classification criteria are not met.
development	
Specific target organ toxicity - single	e exposure
STOT - single exposure	STOT SE 3 - H336 May cause drowsiness or dizziness.
Target organs	Central nervous system
Specific target organ toxicity - repea	ated exposure
STOT - repeated exposure	Not classified as a specific target organ toxicant after repeated exposure.
Aspiration hazard	
Aspiration hazard	Asp. Tox. 1 - H304 May be fatal if swallowed and enters airways. Pneumonia may
	be the result if vomited material containing solvents reaches the lungs.
General information	The severity of the symptoms described will vary dependent on the concentration
	and the length of exposure.
Inhalation	A single exposure may cause the following adverse effects: Headache. Nausea,
	vomiting. Central nervous system depression. Drowsiness, dizziness, disorientation,
	vertigo. Narcotic effect.
Ingestion	Due to the physical nature of this product, it is unlikely that ingestion will occur.
	Aspiration hazard if swallowed. Entry into the lungs following ingestion or vomiting
	may cause chemical pneumonitis.
Skin contact	Repeated exposure may cause skin dryness or cracking.
Eye contact	May be slightly irritating to eyes. May cause discomfort.
Route of exposure	Ingestion Inhalation Skin and/or eye contact
Target organs	Central nervous system

SECTION 12: Ecological information 12.1. Toxicity Toxicity

Aquatic Chronic 2 - H411 Toxic to aquatic life with long lasting effects.

12.2. Persistence and degradability

Persistence and degradability The degradability of the product is not known.

12.3. Bioaccumulative potential Bioaccumulative potential

No data available on bioaccumulation.

Partition coefficient

Not available.

12.4. Mobility in soil Mobility

The product contains volatile organic compounds (VOCs) which will evaporate easily from all surfaces.

12.5. Results of PBT and vPvB assessment 12.6. Other adverse effects

Other adverse effects None known. SECTION 13: Disposal considerations

13.1. Waste treatment methods

	13.1. Waste treatment n	nethods
	General information	The generation of waste should be minimised or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe
		way. Disposal of this product, process solutions, residues and by-products should at all times
		comply with the requirements of environmental protection and waste disposal legislation and
		any local authority requirements. When handling waste, the safety precautions applying to
		handling of the product should be considered. Care should be taken when handling emptied
		containers that have not been thoroughly cleaned or rinsed out. Empty containers or liners
		may retain some product residues and hence be potentially hazardous.
	Disposal method s	Do not empty into drains. Empty containers must not be punctured or incinerated because of
		the risk of an explosion. Dispose of surplus products and those that cannot be recycled via a
		licensed waste disposal contractor. Waste, residues, empty containers, discarded work
		clothes and contaminated cleaning materials should be collected in designated containers,
		labelled with their contents.
	SECTION 14: Transport	tinformation
	General	For limited quantity packaging/limited load information, consult the relevant modal
		documentation using the data shown in this section.
	14.1. UN number	
	UN No. (ADR/RID)	1950
	UN No. (IMDG)	1950
	UN No. (ICAO)	1950
	UN No. (ADN)	1950
14.2. UN proper shipping name		
	Proper shipping name	AEROSOLS
	(ADR/RID)	
	Proper shipping name (I	IMDG) AEROSOLS (CONTAINS pentane)

Proper shipping name (ICAO) AEROSOLS

Proper shipping name (ADN)	AEROSOLS
14.3. Transport hazard class(es)	

ADR/RID class	2.1
ADR/RID classification code	5F
ADR/RID label	2.1
IMDG class	2.1
ICAO class/division	2.1
ADN class	2.1
Transport labels	

14.4. Packing group	
ADR/RID packing group	
IMDG packing group	
ICAO packing group	
ADN packing group	

14.5. Environmental hazards Environmentally hazardous substance/marine pollutant

None None None

14.6. Special precautions for user

Always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

EmS	F-D, S-U
ADR transport category	2
Tunnel restriction code	(D)

14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code Transport in bulk according to Not applicable. Annex II of MARPOL 73/78 and the IBC Code SECTION 15: Regulatory information

15.1. Safety, health and en	vironmental regulations/legislation specific for the substance or mixture
National regulations	Health and Safety at Work etc. Act 1974 (as amended).
	The Carriage of Dangerous Goods and Use of Transportable Pressure Equipment
	Regulations 2009 (SI 2009 No. 1348) (as amended) [\"CDG 2009\"].
	EH40/2005 Workplace exposure limits.
	The Aerosol Dispensers Regulations 2009 (SI 2009 No. 2824).

EU legislation

Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) (as amended).

Commission Regulation (EU) No 2015/830 of 28 May 2015.

Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on classification, labelling and packaging of substances and mixtures (as amended).

Council Directive of 20 May 1975 on the approximation of the laws of the Member States relating to aerosol dispensers (75/324/EEC) (as amended).

15.2. Chemical safety assessment No chemical safety assessment has been carried out. Inventories **EU - EINECS/ELINCS** None of the ingredients are listed or exempt.
